

SHREYAS NEELARADDI

Cloud & DevOps Engineer · AWS · Terraform · Docker · Generative AI
+91 90356 46885 | shreyas2932003@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Results-driven Cloud & DevOps Engineer with hands-on experience architecting and managing AWS infrastructures, containerizing workloads with Docker and Kubernetes, and building robust CI/CD pipelines. Currently delivering high-availability platform environments for 100+ concurrent users as an Associate Software Engineer while integrating Generative AI (LangChain, OpenAI, RAG) into production workflows. Adept at Infrastructure as Code (Terraform, Ansible), observability (Prometheus, Grafana), and ITIL-aligned incident management.

TECHNICAL SKILLS

Cloud & AI	AWS (EC2, S3, IAM, VPC, RDS, CloudWatch) · OpenAI API · LangChain · Prompt Engineering · RAG Pipelines
DevOps & CI/CD	Docker · Kubernetes · Jenkins · GitLab CI/CD · GitHub Actions
IaC & Automation	Terraform · Ansible
Observability	Prometheus · Grafana · AWS CloudWatch
Languages	Python · Bash Scripting · SQL (MySQL) · Linux Administration
Methodologies	CI/CD · Infrastructure as Code · ITIL Incident & Change Management · Agile / Scrum

PROFESSIONAL EXPERIENCE

Associate Software Engineer

Apr 2026 – Present

TheSmartBridge · Hyderabad, Telangana

- Architect and manage AWS cloud environments and sandboxes supporting 100+ concurrent users, ensuring high availability and SLA compliance.
- Provide Tier-2 technical mentorship and architectural guidance on AWS (EC2, S3, VPC), resolving complex deployment bottlenecks and reducing escalation rate.
- Collaborate with cross-functional engineering teams to optimize cloud resource allocation and improve delivery pipeline efficiency.
- Integrate Generative AI tooling and advanced prompt engineering to enhance platform reliability and automate technical support workflows.

INTERSHIPS

AI Intern (Fast Track)

Oct 2025 – Dec 2025

Agnirva – AI Internship Program · Remote

- Completed 100+ hours of intensive GenAI application development, covering LLM prompt design, vector search, and RAG architectures.
- Designed and optimized LLM prompt workflows using ChatGPT and Gemini APIs, improving accuracy and reducing response latency.
- Built a capstone project applying vector embeddings and Retrieval-Augmented Generation (RAG) for context-aware information retrieval.

AI/ML Intern

Oct 2024 – Feb 2025

VTU WIINNR – IT Ignition Program · Remote

- Built and maintained automated ML training and deployment pipelines using Python and GitHub Actions.
- Containerized ML applications with Docker and deployed them on AWS EC2 instances for scalable inference.
- Provisioned cloud infrastructure using Terraform and Ansible for fully automated, repeatable environment setup.

- Designed observability dashboards in Prometheus & Grafana, reducing mean time to resolution (MTTR) for system incidents.

TECHNICAL PROJECTS

CI/CD Pipeline Automation for Flask Application | Jenkins · GitLab CI/CD · Docker · Kubernetes · Terraform · Ansible · Prometheus · Grafana

- Engineered an end-to-end CI/CD pipeline covering automated build, test, and blue-green deployment stages, reducing deployment time by ~60%.
- Containerized a Flask application and deployed it on a Kubernetes cluster, enabling horizontal auto-scaling under variable load.
- Provisioned infrastructure via Terraform (IaC) and automated server configuration with Ansible playbooks for zero-drift environments.
- Integrated Prometheus & Grafana dashboards with alerting for proactive incident response and uptime monitoring (SLA ≥ 99.5%).
- Migrated self-managed MySQL to AWS RDS, improving database reliability and simplifying backup and maintenance workflows.

AI-Powered Resume Screening & Interview Assistant | Python · OpenAI API · LangChain · Streamlit · Flask · Docker Compose · GitHub Actions · MySQL

- Developed a GenAI-powered resume screening tool leveraging OpenAI GPT APIs and LangChain orchestration for automated candidate evaluation.
- Implemented vector embeddings and RAG pipelines for context-aware, hallucination-reduced analysis of resumes against job descriptions.
- Engineered structured prompt workflows with few-shot examples, maximizing relevance and minimizing off-topic model outputs.
- Automated deployment with Docker Compose and a full CI/CD pipeline via GitHub Actions, achieving one-click release cycles.
- Designed normalized MySQL schema and an optimized SQL query layer for persistent storage and sub-100 ms data retrieval.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering Sri Sairam College of Engineering · Bengaluru

2021 – 2025

CGPA: 8.0 / 10.0

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services
- ITIL® Foundation Certificate in IT Service Management – AXELOS
- IBM / Coursera: Introduction to DevOps · Introduction to Cloud Computing · Getting Started with Git & GitHub · Introduction to Agile Development and Scrum
- DataCamp: AWS Cloud Technology & Services · AWS Security & Cost Management · AWS Boto3 in Python · DevOps Concepts · Intermediate SQL · Intermediate Python for Developers · AI-Assisted Coding
