PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 1+ year of hands-on experience designing and managing AWS cloud infrastructures, containerising workloads with Docker & Kubernetes, and building end-to-end CI/CD pipelines. Currently managing high-availability platform environments for 100+ concurrent users and integrating production-grade Generative AI solutions (LangChain, OpenAI, RAG pipelines) as an Associate Software Engineer. Strong foundation in Infrastructure as Code (Terraform, Ansible), observability (Prometheus, Grafana), vector databases, and ITIL-aligned incident management. AWS Certified Cloud Practitioner with a proven track record of automating workflows and reducing operational overhead.

TECHNICAL SKILLS

Cloud & AWS	EC2 · S3 · IAM · VPC · RDS · CloudWatch · Auto Scaling · Lambda (basics) · AWS CLI
GenAI & LLMs	OpenAI API · LangChain · RAG Pipelines · Vector Embeddings · Prompt Engineering · Gemini API
Vector & DBs	FAISS · Pinecone (concepts) · MySQL · AWS RDS · SQL Query Optimisation
DevOps & CI/CD	Docker · Kubernetes · Jenkins · GitLab CI/CD · GitHub Actions · Helm (basics)
IaC & Automation	Terraform · Ansible · Bash Scripting · Python Automation
Observability	Prometheus · Grafana · AWS CloudWatch · Alerting & Dashboarding
Dev & Frameworks	Python · Flask · Streamlit · FastAPI (basics) · REST APIs · Git · Linux Administration
Methodologies	CI/CD · IaC · ITIL Incident & Change Management · Agile/Scrum · 12-Factor App

PROFESSIONAL EXPERIENCE

Associate Software Engineer · TheSmartBridge, Hyderabad	Apr 2026 – Present
- Architect and manage AWS cloud environments and sandboxes supporting 100+ concurrent platform users, maintaining high availability, auto-scaling policies, and SLA compliance. - Provide Tier-2 technical mentorship and architectural guidance on AWS services (EC2, S3, VPC, IAM, RDS, CloudWatch), resolving complex deployment bottlenecks and cutting average ticket resolution time. - Streamline delivery pipeline efficiency by collaborating with cross-functional engineering teams on resource allocation, cost optimisation, and infrastructure right-sizing. - Integrate production-grade Generative AI tooling (LangChain, OpenAI API) and advanced prompt engineering into platform workflows, automating repetitive technical operations and reducing manual effort. - Apply ITIL incident and change management practices to maintain platform stability, enforce change controls, and support post-incident reviews.	

INTERNSHIPS

AI Intern · Agnirva – AI Internship Program (Fast Track)	Oct 2025 – Dec 2025
- Completed 100+ hours of intensive, real-world AI and GenAI application development covering LLMs, vector search, embedding models, and cloud-native deployment. - Designed and optimised LLM prompt workflows using ChatGPT (GPT-4) and Gemini APIs, improving output accuracy and reducing inference latency through systematic prompt chaining techniques. - Built a capstone project applying FAISS vector search and Retrieval-Augmented Generation (RAG) architecture for context-aware, hallucination-reduced information retrieval from large document corpora.	

- Built and maintained automated ML model training and deployment pipelines using Python and GitHub Actions, reducing manual deployment steps and accelerating model iteration cycles.
- Containerised ML applications with Docker and deployed on AWS EC2 instances, achieving portable, environment-consistent workloads across dev and prod.
- Provisioned cloud infrastructure using Terraform and Ansible, enabling fully automated, repeatable environment setup with zero manual configuration drift.
- Designed Prometheus & Grafana observability dashboards with custom alerting rules, reducing mean time to detection (MTTD) and mean time to resolution (MTTR) for system incidents.

TECHNICAL PROJECTS

CI/CD Pipeline Automation for Flask Application

Jenkins · GitLab CI/CD · Docker · Kubernetes · Terraform · Ansible · Prometheus · Grafana · AWS RDS

- Engineered an end-to-end CI/CD pipeline across build, test, staging, and production stages, reducing release cycle time and eliminating manual deployment steps.
- Containerised a Flask application and orchestrated it on a Kubernetes cluster with rolling update strategy, enabling horizontal scalability and zero-downtime deployments.
- Provisioned all cloud infrastructure via Terraform (IaC) and automated server configuration with Ansible playbooks, achieving fully idempotent, repeatable environment setup.
- Integrated Prometheus metrics collection and Grafana dashboards with custom alerting, enabling proactive incident detection before user impact.
- Migrated from self-managed MySQL to AWS RDS, eliminating single-point-of-failure and offloading backup, patching, and failover management.

AI-Powered Resume Screening & Interview Assistant

Python · OpenAI API · LangChain · FAISS · Streamlit · Flask · Docker Compose · GitHub Actions · MySQL

- Developed a full-stack GenAI application for automated resume screening and interview assistance, leveraging OpenAI GPT APIs and LangChain for intelligent multi-step candidate evaluation.
- Implemented FAISS vector embeddings and a RAG pipeline to ground LLM responses in candidate data, significantly reducing hallucinations and improving evaluation precision.
- Engineered a structured multi-stage prompt workflow with output parsing and validation, maximising response relevance and enforcing consistent evaluation rubrics.
- Containerised the full application stack with Docker Compose and automated CI/CD via GitHub Actions, enabling one-command environment provisioning for dev and prod.
- Designed a normalised MySQL schema with optimised SQL queries for fast persistent storage and retrieval of candidate profiles and evaluation results.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

2021 – 2025

Sri Sairam College of Engineering, Bengaluru · CGPA: 8.0 / 10.0

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** – Amazon Web Services
- **ITIL® Foundation Certificate in IT Service Management** – AXELOS
- **IBM / Coursera:** Introduction to DevOps · Introduction to Cloud Computing · Getting Started with Git & GitHub · Introduction to Agile Development and Scrum
- **DataCamp:** AWS Cloud Technology & Services · AWS Security & Cost Management · AWS Boto3 in Python · DevOps Concepts · Intermediate SQL with AI · Intermediate Python for Developers · AI-Assisted Coding
